Pelvic Floor Accessories

BENEFITS

HYPOALLERGENIC

Made from biocompatible porcelain without pigments or dyes. Hybrid between natural stone and glass.

SOFT TOUCH

The surface is soft to the touch, ideal for people with hypersensitivity.

VERY STRONG

The composition of porcelain makes it an extremely pressure-resistant material. No danger of the product breaking while in use.

COMPATIBLE

Unlike some plastic-based products, porcelain is compatible with all types of lubricants, whether water-based or silicone-based.

BODY SAFE

Limoges Porcelain is a natural material that contains no plastics, BPAs or Phthalates, that is non-porous and doesn't degrade with time.

THERMALLY CONDUCTIVE

Can be warmed to relax muscles or cooled to reduce pain.

TESTIMONIALS

“As a perineal rehabilitation physiotherapist, I greatly appreciate the Kaolii internal massager as a tool for muscle stretching and myofascial mobilization for the pelvic floor. The curved shape and firmness of the Kaolii allow for optimal stretching of the levator ani compared to a standard elongated vaginal dilator.”

Additionally, I can use it to treat trigger points in the deep pelvic floor muscles, but the firmness and rounded tip of the Kaolii also gives patients the ability to do this on their own in a comfortable way.”

– Stéphanie Bernard, P.T.

« Having had an episiotomy at my first delivery, I was still experiencing intravaginal pain after 1 month.

I wanted to go back to my normal sexuality, but with the pain it was not possible.

Kaolii's internal massager perfectly met my need for perineal rehabilitation. In addition to relieving pain, it allowed me to find and understand my body again. »

– Marie-Ève, Client
